

Participant Access to Research Core

UAB Comprehensive Healthy Living Research Center

About

The Participant Access to Research Core (PARC) assists investigators in reaching their study goals for participant recruitment, retention, and data collection for community-engaged and population health studies, as well as clinical trials.

Our Team

With a team of telephone survey interviewers, data management personnel, focus group/interview facilitators, and recruitment coordinators, PARC can provide a cost-effective, centralized resource for conducting research.

Work With Us
