

CCTS Training Academy

Center for Clinical and Translational Science

The CCTS Training Academy offers interdisciplinary, educational programs and enrichment activities for research teams across the academic career arc including graduate and postgraduate students, staff professionals, early career and established faculty and the community. The Training Academy is continuously enhancing CCTS Training Programs and finding creative methods to deliver outstanding programs conducive for success in the translational science workforce.

Training Academy Featured Programs

Translational Research Summer Series
8-week series of introductory concepts of translational research that is open to all academic and career levels.

NRSA T32
1- and 2-year Predoctoral Clinical/Translational Research Program focused on pre-doctoral health professions.

NRSA T32
2-year Postdoctoral Dissemination and Implementation Science Program

K12
Two-year Deep South Mentored Career Development Program for early career faculty.

Case Studies In Mentoring
8-week series of presentations on topics related to the nuances of the mentor-mentee relationship through case-based discussions. All sessions facilitated by experienced mentors.

DRIVEN
Interdisciplinary investigators collaborating to promote career development and advancement while building a strong, representative research workforce.

ACTION LEARNING
PRESENTED BY CCTS

Novel Method.
ACTION Learning uses local actors to illustrate real-life scenarios for a learning experience that covers any foci in the Training Academy

Grantsmanship

Clinical and Translational Science

Innovation and Entrepreneurship

Career Development

Clinical Research

Mentorship, Leadership, & Team Science

Data Science and Artificial Intelligence

Grant Writing Intensive Program (GRIT)
Mock Study Section
Biostatistics, Epidemiology, and Research Design (BERD)
Kaizen R2T (Rigor, Reproducibility, and Transparency)
CCTS Panels

Friday Fellows
Clinical and Translational Science Training Program (CTSTP, Epi 680)
Translational Research Summer Series

I-Corps@NCATS
Innovation Panels (iPanels)
Health Sciences Entrepreneurship Grand Rounds

Training Interdisciplinary Emerging Research Scholars (TIERS)
Mini-Sabbaticals
CCTS Translational Science Symposium
TIERS+

Clinical Investigator Training Program (CITP)
Research Seminar Series (RSS)
Research Orientation Program (ROP)
Research Training Program (RTP)
Clinical Trials Lunch & Learn

Case Studies In Mentoring
CREATE (Collaborative Research and Effective Teamwork Essentials)
RISE (Relate | Inspire | Strategize | Elevate)
Leadership Training
Driving Research: An Interdisciplinary, Vibrant, Engaged Network (DRIVEN)

Hackathon
Informatics Journal Club
Powertalk Seminar Series
ATTIS Conference
AI in Medicine Graduate Certificate
